

*ABSTRACT AMENDMENTS*

Replace the Abstract with:

A second strip conductor 7 is ~~provided such that its position~~ located, in the a lamination direction of the a multilayer substrate 5, at a different position from that of the a first strip conductor 8. A first grounding conductor 2 and a second grounding conductor 6 are disposed sequentially in the lamination direction of the multilayer substrate 5 and ~~sandwiching~~ sandwich the first strip conductor 8 and the second strip conductor 7. The first grounding conductor 2 includes a first grounding conductor portion 3 ~~provided for the a~~ wiring prohibited area 1 in which no wiring may be placed, and a second grounding conductor portion 4 ~~provided~~ for an area other than the wiring prohibited area 1. The second grounding conductor portion 4 is ~~provided such that its position~~ positioned, in the lamination direction of the multilayer substrate 5, at a location is different from that of the first grounding conductor portion 3.
